

LG G3 Screen flicker and fades

Lg G3 Screen flicker and fades to Darkness !

Written By: albanjakupi

INTRODUCTION

1* Take the battery out.

2* Unscrew the whole back.

3* You will see a connector down at the charger port take them off and you can blow some air to take the dirt off.

4* Take some paper and fold it 4 to 6 times (small one)

5* After folding it make sure it is the size of the connector that is next to the Camera.

6* Place the folded paper on top of the connector.

7* Slowly get back all the plastic covers.

8* Screw in all the screws.

9* Place the battery, SD Card and the Sim back

10* Power on the Phone.

99.9% It will work.

TOOLS:

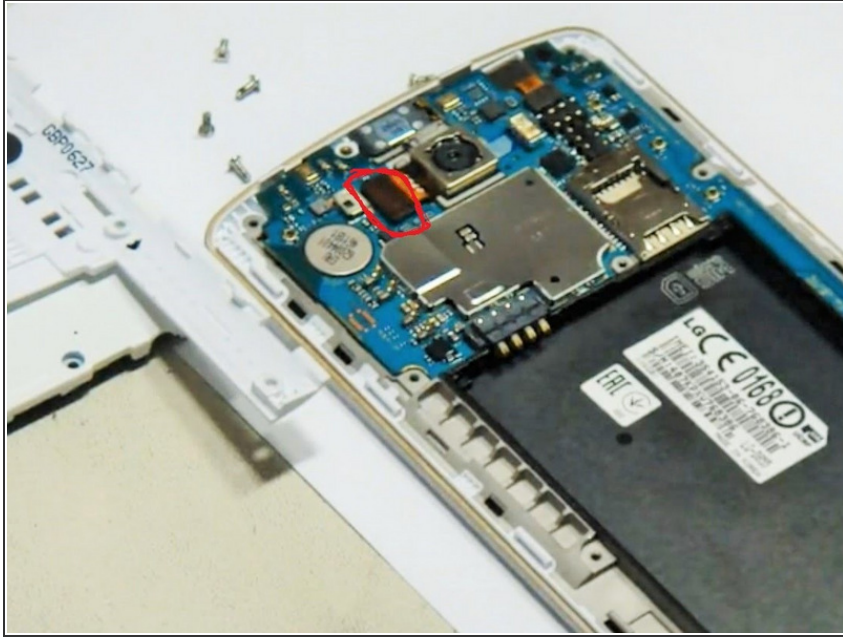

- [Phillips Screwdriver](#) (1)

PARTS:

- [Paper](#) (1)

Step 1 — Place The Folden Paper Here!

- Place The Paper Here On this Connector!

It is not to Hard to perform this Fix.

Just don't touch anything else and be careful while taking the plastic cover off....

Everything is going to be fine.
